## 5 ISO 14000: EMS Days Training Course

## Course Description

**Introduction** With the needs and regulations becoming tougher day by day to protect the environment by creating awareness to environment obligations, organizations require assistance to install an Environment Management System, DIPL, with its trained and qualified counsellors provide the necessary assistance in the development, installation and implementation of Environment Management System. DIPL has helped number of organizations in this attempt and has set an impression in the minds of the clients the knowledge it can impart in developing an excellent

## Course Description

To provide the delegates the necessary inputs in terms of knowledge and skills for the effective audit of environmental Management System. The concept of Environment and its management will be discussed, in particular relation to auditing as an internal requirement and as a third party certification requirement.

## Intent of the course

## Awareness & Implementation

**Training** :By the end of the course the delegates would be able to :

- Plan an audit for EMS
- Interpret the requirements of 14000 standard
- Plan for the preparation of documentation & implementation
- Identify non conformities
- Report nonconformities

## Notes

This is an intense course with daily homework and a final exam (similar to the LA exam). A study guide is issued to direct participant's pre-class study.

## Who should join

Those who require detailed knowledge of EMS Auditing Process. Those managing internal EMS Audit within their organization. Those who wish to and are responsible to implement EMS based on ISO 14000 Latest edition requirements, in the organization. Existing EMS internal auditors who wish to expand their auditing skills

## Bring to Class

Students should bring to class: a calculator, a straight edge, pencils, highlighters, lots of questions, and a "CAN-DO" attitude. Also, participants must bring the appropriate Attitude required for the exam.
